Library Mangement System

Description

- ❖ To create a basic digital system for managing books and library members.
- ❖ Helps in issuing, returning, buying books, and managing member and book data.
- ❖ Uses arrays and conditional logic

Purpose

- ❖ To demonstrate core C++ concepts (arrays, loops, conditionals, functions, input validation).
- ❖ To provide a functional tool for tracking books, members, and lending activities.

Features

1	
2	
3	
4	01 Issue Book
5	
6	02 Return Book
7	
8	
9	03 Buy Book
10	
11	
12	04 Register Member
13	
14	}
